### DEATAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 11, 2003 has been entered.
2. The amendment filed December 11, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Page 15, line 20, the added text "More preferably- -- -the melting temperature of polypropylene" after the phrase "from about 90 to 140°C " is a new matter. The specification as originally filed does not provide support for the added text.

Applicant is required to cancel the new matter in the reply to this Office Action.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1-3, 7-10 and 13-16 stand rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject

matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. For the reasons of record set forth in paragraph 2 of the Office Action mailed May 29, 2002 (paper No. 5).

5. Applicant's arguments filed December 11, 2003 and March 4, 2004 have been fully considered but they are not persuasive. In reference to rejection of claims under 35 USC § 112 first paragraph, applicants mainly argue that a multilayer film is enabling because the multilayer film is uniaxially oriented at the temperature above melting temperature of ethylene based polymer and at or below melting point temperature of propylene based polymer. The uniaxially oriented multilayer film has uniaxially oriented layers of propylene based resin and the layer of ethylene based resin barely has molecular orientation. Thus laminated article containing the differently oriented layers has a mechanical interaction based on anisotropy. Thus, higher tear strength in the stretching direction is obtained. In support for these arguments applicants have submitted a Declaration under 37 CFR 1.132 of Mr. Yanase.

Both the arguments and the Declaration are unpersuasive because the unoriented ethylene based resin layer would have tear strength equal in every direction while the molecularly uniaxially oriented propylene based resin layer will have higher tear strength in the transverse direction. Therefore the final product would have higher tear strength in the transverse direction since the method of instant disclosure is a conventional method.

6. All claims are drawn to the same invention claimed in the parent application prior to the filing of this Continued Prosecution Application under 37 CFR 1.53(d) and could have been finally rejected on the grounds and art of record in the next Office action.

Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing under 37 CFR 1.53(d). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
